

Please do not let LPFM stations take priority over current FM stations with translator service such as K-LOVE. K-LOVE is broadcast from Rocklin, California, but we listen to it here, in the greater Phoenix area. If it is localized, then many states in the USA would miss out on the only station that I and my daughters have listened to, for the past 8 years. It provides the positive music that I desperately need, and it is safe for children to listen to, and encourages them. I believe that if K-LOVE were to be displaced by an LPFM broadcaster providing other programming, that may not be as wholesome, the community would be shortchanged, possibly causing more hatred, road rage, and crime in our community. K-LOVE services our community by providing uplifting music and messages for those who may not have a Christian community or church to support them, or if they are unable to go to church because of their work situation. K-LOVE is there 24 hrs. a day to minister to these people. Also, many cross-country truck drivers are encouraged as they listen to K-LOVE when they are driving from state to state. If the station is "localized" these truckdrivers would also lose their ability to hear K-LOVE.

Thank you for your consideration.
